

# GREEN Custom Cabinetry

BETTER PRODUCT. BETTER WORLD.

Crystal's GreenQuest construction offers you a multitude of options to design healthy and sustainable custom cabinetry. Create your cabinetry by choosing green materials and features that are especially important to you and your project. **Crystal's GreenQuest products can qualify your project for LEED\* credits.**

*Cabinet depicted shows a bamboo exterior.*

## GREEN-CORE

- No added urea-formaldehyde and moisture-resistant American made plywood box construction.

## FSC®\* HARDWOODS & BOX WORK

- Available in 80 plus doors.
- Available in select wood Species.

## GREEN FINISHES

- Low-emitting by request
- Solid wood drawers

## GREEN-GUARD® LAMINATES

Significantly diminishes emissions.

## ENGINEERED VENEERS

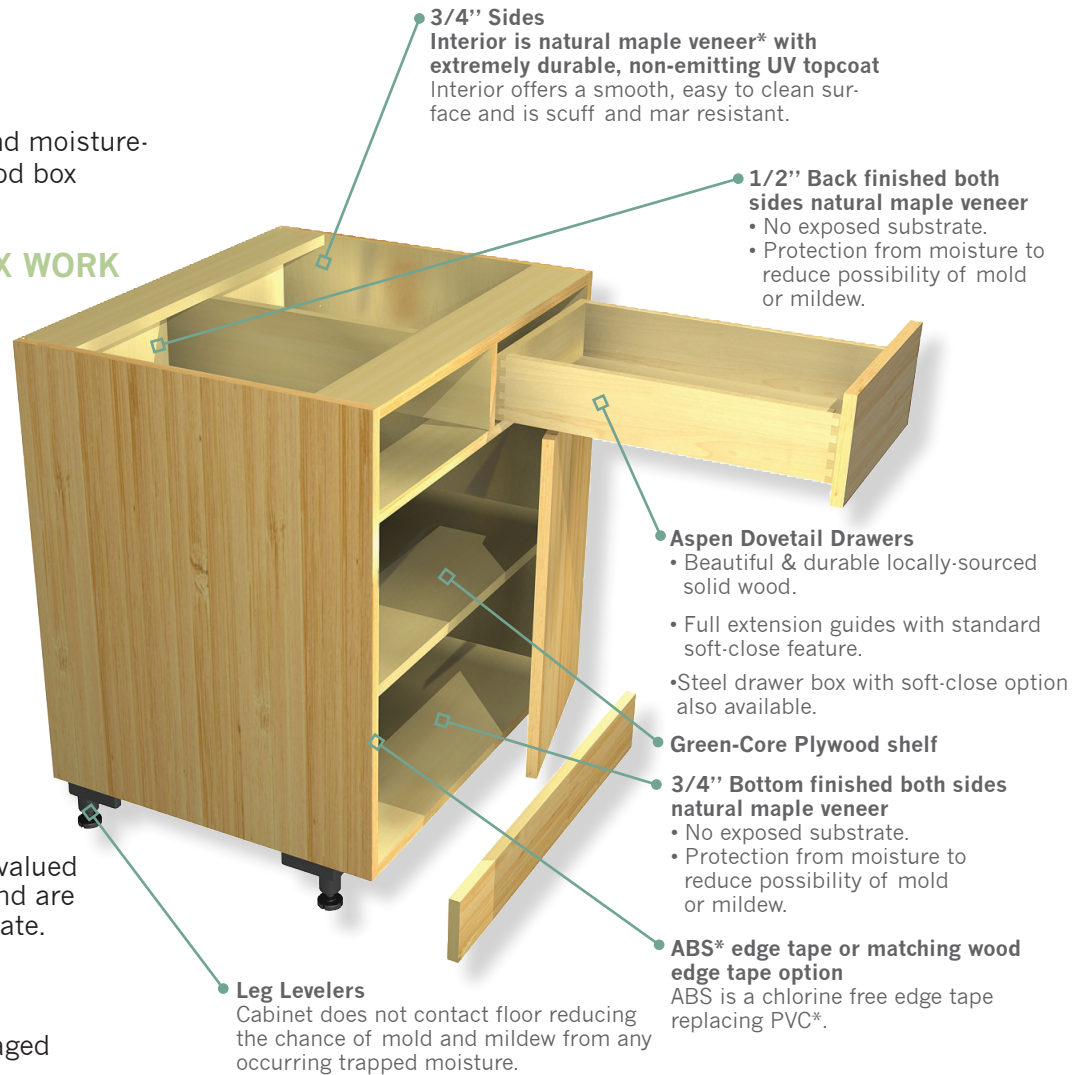

Engineered veneers utilize under-valued wood species for an exotic look and are available with low-emitting substrate.

## LYPTUS

Harvested from sustainably-managed plantations.

## BAMBOO

Crystal's bamboo doors can be manufactured using Green-Core substrate. Bamboo meets the LEED definition of rapidly-renewable.

### \*Real Wood = Real Character

The natural grade of our maple veneer interiors supports the sustainable use of natural resources, meaning it utilizes the majority of the harvested tree, and will exhibit natural maple characteristics. The interior may include a mix of color from light to dark wood character such as mineral streaks. The natural characteristics are a true reflection of the real beauty of wood.

ABS – acrylonitrile butadiene styrene  
CPA – Composite Panel Association  
EPP – Environmentally Preferable Product  
ESP – Environmental Stewardship Program  
FSC® – Forest Stewardship Council  
KCMA – Kitchen Cabinet Manufacturers Association  
LEED – Leadership in Energy & Environmental Design  
UV – ultra violet  
PVC – polyvinyl chloride

# GREEN QUEST BY CRYSTAL

Support your healthy, sustainable lifestyle through green custom cabinetry from Crystal Cabinets, a manufacturer with a legacy of the strongest environmental ethics in the industry.

Balancing durable cabinetry and environmental responsibility, Crystal offers GreenQuest with no-added urea formaldehyde plywood, low-emitting finishes, and rapidly-renewable cabinet components.

Attesting to its durability, Crystal's green products are backed with a limited lifetime warranty.

## WHAT MAKES GREENQUEST CABINETS GREEN?

### Low emitting finishes

Low emitting finishes available by request.

The mark of responsible forestry

Featuring wood sourced responsibly from well-managed forests according to the principles of the Forest Stewardship Council™, Crystal's chain of custody certification (certificate SGSNA-COC-005701) tracks FSC® certified material from the forest to the consumer. FSC® certified cabinetry available in select species and may be eligible for LEED credits.

### No added urea-formaldehyde plywood

Green-Core plywood is American made with no added urea-formaldehyde and moisture resistant resins.

Green-Core plywood interior surfaces are coated with a non-emitting and exceptionally durable UV topcoat.

ESP Certified

Crystal is certified to the requirements of ESP\* 03-10 for Air Quality, Resource Management of Product and Process, Environmental Stewardship and Community Relations under the KCMA\* Environmental Stewardship Program.

Composite Panel Association's Environmentally Preferable Product Downstream Program

Crystal is a licensed facility under the Composite Panel Association's Environmentally Preferable Product (EPP) downstream user programs. Over 95% of the composite products used at Crystal meet the criteria for recycled content and emissions.
